

Supervisor Mechanical – Elkford, BC

Schedule: 4x4 (For day shift coverage – 4 days of work followed by 4 days of rest)

Position organizes, directs and supervises the Mechanical Services function of the branch operations. Position oversees a shop that maintains and repairs mining equipment. Responsibilities include procedures, scheduling, cost control, equipment specification conformity, and establishment of workforce levels and maintenance of accurate records. Implements company policies and procedures, establishing mechanical maintenance and repair practices. Position assigns work and allocates tradespeople time to best utilize available workforce; assists tradespeople in repair procedures and techniques when problems are encountered.

Qualifications:

- Incumbent must be a Heavy Equipment Technician, journeyperson or relevant education with a minimum of 3 to 5 years' experience as a qualified tradesman and Supervisory experience.
- Position requires a thorough knowledge of maintenance and repair of mining equipment.
- Strong ability to plan, develop, coordinate, and direct detailed phases of mechanical functions including the performance of the same.
- Conduct independent evaluation, selection, adaptation, and modification of mechanical services "best practice".
- Strong knowledge of Mine's Act, OH&S acts and regulations and equipment inspection requirements; and Supervisor's Certificate and First Aid would be an asset.
