MICOM Presentation
November 4, 2019

Anoop Singh is a graduate of McGill University with a Bachelor's in Civil Engineering. He has accumulated nearly 20 years of experience in heavy civil and mining operations.

Anoop joined Bird Construction (formerly H.J. O'Connell) in 2003 and progressed through the company as a Field Engineer, Site Superintendent, Project Manager and Director of Operations for Quebec. In 2016, Anoop was appointed to the role of Vice President – Strategic Development and Estimating and holds the responsibility of attracting and retaining clients, as well as managing several of the company's Indigenous partnerships.

Although Anoop is a Civil Engineer, most of his career has been mining focused. As a near full time resident of Fermont, Quebec for 10 years, Anoop has had the opportunity to manage multiple projects for ArcelorMittal, Rio Tinto and Cliffs,

and has also managed or lead the pursuit of work with other major mining accounts such as Vale, and Agnico Eagle.
