

Vice President, Operations**Swiss Water Decaffeinated Coffee**

Delta, BC

Swiss Water Decaffeinated Coffee is a leading specialty coffee company whose core business is the decaffeination of premium quality green coffee. Its premium quality, chemical free coffee decaffeination operation uses Swiss Water® Process to decaffeinate green (raw) coffee for its customers around the world. Swiss Water Decaffeinated Coffee Inc. is headquartered in Delta, British Columbia.

Swiss Water Decaffeinated Coffee also owns Seaforth Supply Chain Solutions, a green coffee handling and storage facility providing integrated and efficient coffee handling services for Swiss Water Decaffeinated Coffee as well as the third-party customers who store coffee in Vancouver.

Due to an upcoming retirement of the incumbent, Swiss Water Decaffeinated Coffee has launched a search to identify a new Vice President, Operations. Reporting to the President & CEO, the Vice President, Operations (VP) will provide leadership to the operations of the new production facility in Delta, including the development and execution of strategic business plans. The VP will ensure the operations are running at the highest level of quality and efficiency through the implementation of best practices, new systems and methodologies and through development of a strong, effective and highly visible management team.

The ideal candidate is a senior manufacturing leader with a track record of success as a Chief Operating Officer, Vice President, Operations, General Manager or Plant Manager leading plant operations, ideally in a 24/7 environment. The candidate brings strong business acumen and has held profit and loss responsibility for production plants. They will be comfortable supporting the company's manufacturing and development activities with expertise, original concepts and ideas. Experience in continuous extraction processes such as plant extraction, oil and gas, pulp and paper or mining would be advantageous.

This role will be based at the corporate head office and manufacturing plant in Delta, British Columbia.
